

Managed Broadband Service

Reliable Connectivity Across Every Location. Simplified.

Built for Multi-Site Restaurants, Retailers, Convenience Stores, and Unmanned Sites

Managing broadband for dozens — or hundreds — of locations doesn't need to be complex. The Acumera Managed Broadband Service delivers fast, reliable, and fully supported connectivity so you can scale operations without the ISP (Internet Service Provider) headaches.

What's Included

Tailored Connectivity Per Location

We research and source the fastest, most cost-effective broadband for each site.

Break-Fix ISP Management

We manage thousands of ISP connections—giving us direct access to top-tier ISP resources and freeing your IT team from troubleshooting

Full-Service Provisioning

We order, configure, and provision broadband on your behalf.

Real-Time Uptime Visibility

Access site-specific uptime data through the AcuVigil™ dashboard.

One Vendor. One Invoice.

One consolidated bill, expert support, and fully managed ISP service—often at a price comparable to going direct, thanks to our high-volume buying power.

Optional Cellular Backup (WAN Failover)

Automatic failover to LTE ensures your critical systems stay online during outages.

24/7 Monitoring and Support

Our team proactively monitors your network and resolves issues before they disrupt operations.

Designed for distributed businesses that can't afford to lose connectivity.

Why It Matters

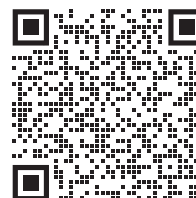

- Avoid costly network downtime and transaction disruptions
- Offload the burden of ISP management from your IT team
- Speed up rollouts, upgrades, and site openings
- Maintain PCI compliance and operational visibility
- Gain predictable performance across all locations
